

MATH FACTS

Dear Parents,

We have been focusing on addition computation. We will assess each child beginning with addition facts...+0, +1, +2, +3,+4, doubles, neighbors, +10, parts of 10, +9, +5,+6, +7, and +8. Your child will proceed onto subtraction facts after they have mastered the addition facts. We will continue to challenge those who have mastered subtraction facts with multiplication and division facts.

Attached (great resources):

- parent strategies page, which will guide you in helping your child to learn addition problems
- 100 problem addition page: This addition page will be given periodically. Your child will be given seven minutes to complete as many problems as he/she can. We encourage you to photocopy this page and use it for extra practice at home. The goal is to do at least one better each time. A good thing to do after the seven minutes has passed is to have your child complete the sheet in another color of ink.
- Ten frame, ten strip, and hundred number board

Math Facts Quizzes:

- Ten problems
- One minute timed test
- Tests will be given every Wednesday
- Test problems will be found in your child's Spelling notebook (Guthrie) or assignment notebook (Stilley and Ruiz)
- First test was Wednesday, Nov. 11, 2009 on +0's. You should have seen the little math facts sheet come home.
- **STUDY DAILY FOR 10 MINUTES!**

Great Ways to Study

- Flashcards
- Memory game
- Deck of cards (without jacks, queens, and kings)
- Websites in this week's newsletter

Thanks, Ms. Guthrie, Mrs. Ruiz, and Ms. Stilley
